

LAW ON TRAIL OF 'REV.' HUNNICUTT'S WEDDING BUREAU

District Attorney Wilson
Files Petition.

QUICK INQUIRY IS MADE

Aroused over the conduct of "Rev." George J. S. Hunnicutt, who conducts a "marriage office" near the City Hall, and who is said to employ "cappers" to secure marriage business, The Washington Herald about two months ago investigated Hunnicutt's right to perform marriages, and after thorough examination of the legal questions involved, arrived at the conclusion that Hunnicutt was not a duly ordained minister of the Gospel within the meaning of the law, and that for that reason his authority to perform marriages should be revoked. The Ministers' Alliance took the matter up, and at a meeting resolved to petition the District Supreme Court to revoke Hunnicutt's authority.

HISTORY OF "CHURCH"

Chief Justice Claiborne, into whose hands the ministers' petition was placed, turned it over to United States District Attorney Wilson, directing him to investigate the matter and make report of his findings. Samuel McC. Hawken, assistant United States attorney, was entrusted with the task by Mr. Wilson, and yesterday the district attorney filed his petition to revoke Hunnicutt's authority. Justice Barnard issued a rule against Hunnicutt, requiring him to show cause Friday, December 1, why the authority he has to solemnize marriages should not be revoked.

The petition sets forth that at a meeting of ten persons held November 16, 1910, the "People's Nonsectarian Church" was organized, and that these persons did not claim to be members of this so-called church, and that they did not agree upon any common system of faith nor adopt any constitution or rule or by-laws prescribing any rites and ceremonies to be observed by the members of the so-called church.

It is further stated by the district attorney that the trustees failed to file a certificate of their election, as provided by the code, and that the certificate which was filed later was defective.

Incorporation an "Evasion."

That the incorporation of this church and the alleged ordination of Hunnicutt were in reality a mere evasion of the short of the statute in the declaration of the district attorney, and were devised and intended to deceive and impose upon Justice Barnard and to procure from him an authority which had been fully informed in the premises, he would not have granted.

Hunnicutt, according to the petition, has employed "cappers," who intercepted parties on their way to the clerk's office to obtain marriage licenses and solicited of such parties the privilege of performing the marriage ceremony. It is also claimed that Hunnicutt pays a portion of the fee for the license to the "capper" who secures the business for him.

"This conduct on the part of Hunnicutt," continues the district attorney, "tends to bring discredit upon this honorable court in connection with the exercise of its power to authorize fit persons to perform the marriage ceremony and its power to issue marriage licenses, and to bring discredit upon the holy rite of matrimony, and petitioner states that Hunnicutt is, by reason of the facts set forth above, not entitled to officiate at marriage ceremonies, and is not a proper fit person to have authority from this honorable court to celebrate marriages in the District of Columbia."

Prepare to Pull Wool.

President Taft yesterday told Senator Smoot that he would receive a committee from the National Wool Growers' Association and the State associations of Utah and Wyoming to-morrow to discuss with them the wool features of the coming message.

"Petitioner states that the said George J. S. Hunnicutt is, by reason of the facts set forth above, not entitled to officiate at marriage ceremonies, and is not a proper fit person to have authority from this honorable court to celebrate marriages in the District of Columbia."—(Clarence R. Wilson, United States District Attorney, in his petition to the District Supreme Court to revoke Hunnicutt's authority to celebrate marriages, granted him October 28, 1910.)

ABE MARTIN SAYS:

A romantic girl allus marries a

Th' farmer that used t' go home after 'er parade now stays fer 'er show.

ST. ANDREW'S SOCIETY MEETS.

Several New Members Admitted and Banquet Plans Discussed.

A largely attended meeting of the Scottish St. Andrew's Society was held last evening at 709 Tenth street northwest. Among other business transacted was that of electing new members, of whom there was an unusually large number.

It was announced at the meeting that the annual banquet will be held at Harkness' on December 18, and will be marked by the usual Scotch features, such as haggis and bagpipes. A record attendance is expected this year.

NANKIN WILL FALL.

Chinese Revolutionists Closely Press the City.

Pekin, Nov. 23.—The situation at Nankin, where Gen. Chang, in command of the imperialist forces, is being closely pressed by a large body of revolutionists, is admitted beyond control. Gen. Chang is acting on his own responsibility, and his defeat is believed to be only a matter of time. Owing to his attitude the government has practically repudiated him.

Tang Shao Yi, former minister of posts and communication, has declined to serve in Premier Yuan's cabinet. He stated that he desired more freedom in order that he may approach both the government and the revolutionists in the interests of peace. Tang is the prime mover in the scheme for settling the future government of the country.

CHINESE SITUATION IS TALKED OF AT WHITE HOUSE

Secretary of State Knox yesterday talked over with the President the developments in China, but he was unable to announce this government's policy with regard to the serious situation there after he had concluded the interview at the White House.

The War Department announced that transport Sherman is now at Manila to take any troops to China that it may be decided to send.

Carroll Institute Lecture.

The first of a series of lectures to be given this season under the auspices of Carroll Institute, was given last night by Frank E. Buckland, before a large audience at Carroll Institute Hall. The committee in charge of the lecture is composed of P. T. Moran, chairman; Thomas J. Finnin, and John J. Connolly.

WRIGHT AGAIN DEALS BLOW AT LABOR LEADERS

"No Faith in Motion in Contempt Case."

VIGOROUS TERMS USED

Judge Daniel Thew Wright, voicing the opinion of the District Supreme Court in general terms, yesterday overruled motions of Samuel Gompers, John Mitchell, and Frank Morrison to dismiss contempt proceedings against them on the grounds of the application of the statute of limitations.

He held that contempt of court is not a crime and can therefore not be subject to the statute of limitations.

"NO MERIT IN MOTION."

He gives the counsel representing the labor leaders three days in which to reach an agreement with the committee previously appointed as to a suitable person to be named commissioner to take testimony as to the contempt alleged.

"There being no faith and merit in any part of the motion, it must be overruled," said Wright.

Of the parts of the labor leaders' motion urging the dismissal of the contempt proceedings, he said that they "only be made, for they seem to be based on frivolous and insubstantial grounds."

Continuing, the opinion says: "Of the fallacy that alleged contemptors are contending with judges, contemptors cannot soon forget the contempt case in which charges of contempt are true, the contempt is against the supremacy of the law. The duty and concern of judges is only this: That for and in the name of the people the supremacy of the law shall be maintained."

Results from Appeal.

The contempt proceedings in which this decision was rendered are not the original proceedings in which Gompers, Mitchell, and Morrison were sentenced to jail terms, but came up as the result of an appeal to the full bench of the District Supreme Court, from the sentence imposed by Judge Wright.

This case was argued before Judge Wright and his associates of the Supreme Court of the District of Columbia, October 20. The question decided dealt with the application of the statute of limitations to proceedings in contempt, the imposition of which is a delay to the court, and whether testimony in a contempt case should be heard in open court or before an examining committee.

The labor leaders contended that as contempt is a criminal charge they should be given the benefit of the doubt and of the statute of limitations, and that more than three years has expired since the contempt alleged was committed. The injunction in the Buck Stove and Range Company's case, which they are said to have violated, having been passed in December, 1907.

Contemnor Termed Insolent.

After disposing of the first cause advanced as grounds for dismissal by holding that the statute of limitations has no application in contempt proceedings, Justice Wright attacks vigorously the other two allegations, saying:

"Nor does the court say that these paragraphs are not of an affrontive and insolent nature which would justify and perhaps ought to require the striking of them from the files of the court."

"For an alleged contemnor to demand of a judicial tribunal justification or excuse for laches is not sooner calling him to account is novel, at least. However, the court is disposed to look at the meaning of the expression 'laches' with a view of uncovering what might be suspected to be a lack of sincerity on the part."

The court then defines in detail "laches" and sets up that the principle is not applicable in the case in hand, saying that the doctrine can only be applied between suitors before the court in their effort to call the power of the court to activity in their behalf.

Russia exported nearly 2,000,000 eggs last year.

"POWER PRESS QUESTION UP TO CONGRESS," SAYS RALPH

Declaring that he had no direct part in the passage of the order providing for the installation of power presses to supplant the hand presses in the Bureau of Engraving and Printing, Director Ralph yesterday afternoon stated that he would make no direct part in the contest of Congress to oppose the attempt of organized labor to prevent the introduction of power machines. "I had no direct part in the passage of the power press installation order," said Mr. Ralph. "Congress will be the judge in this matter. It has passed the legislation, and it is the body to erase the order from the statute books if such action is really demanded by the majority of the people. I am not worrying over public opinion. Organized labor can talk all it wants to. I have done what I think is for the general good of the people throughout the country. I am executing my duties faithfully, honestly, efficiently, and with the best interests of the country at heart."

DRYDEN HOLDING HIS OWN.

Former Senator Has Even Chance of Recovery.

Newark, N. J., Nov. 23.—Former United States Senator John F. Dryden, president of the Prudential Life Insurance Company, who has been in a serious condition since Sunday, when he was operated upon for gall stones, was in a critical state early this evening in his home, and for a time the physicians feared that he would not live through the night.

Shortly before midnight, however, the doctors had more hopeful news. They said that Mr. Dryden then was sleeping and was better than he had been for several hours. They thought there was even a good chance of his recovery.

WEATHER CONDITIONS.

U. S. Dept. of Agriculture, Weather Bureau.

Washington, D. C., Nov. 23.—A cold wave, the first of the season, is moving across the Atlantic States. The temperature will fall Friday in the Lake region, the Ohio Valley, Tennessee, and the East Gulf States, and Saturday throughout the Atlantic States. The temperature will fall Friday in the Lake region, the Ohio Valley, Tennessee, and the East Gulf States, and Saturday throughout the Atlantic States.
